WELCOME TO *WORLDWIDE SOCCER™ 98*

Worldwide Soccer 98 brings you six play modes, with some changes that will please even the most demanding soccer fans.

For the first time in Sega soccer history, you can choose a club team to play. Choose any of Sega's English, French and Spanish teams...in all, 20 club teams to choose from. Open up Club Exhibition or Club League and take your favorite club team to the pitch!

We've added two brand new stadiums over the last year, so you now have five battlefields to choose from. Rain or sunshine, night or day, once again you get to set the environmental conditions.

Be sure to check out the Tactics screen, especially the Kicker Select option. It's up to you to decide which players on your team will take the corner, goal and free kicks.

Are you ready to go up against 68 teams from around the world this year? Let's hope so, 'cause this game is hotter than ever!

6Player™ Multiplayer Adapter

Up to four people can play at the same time through the use of this peripheral (sold separately). Team up with a friend to take on the computer or go for an all-human soccer fest!

Just plug the adapter into Port 2 of your Sega Saturn. Note that Ports 4, 5 and 6 of the adapter are not used.

Sega Saturn Backup™ Cartridge

Save your Worldwide Cup, Club League and Cup Tournament match data and take it with you with the Sega Saturn Backup cartridge (sold separately). From the cartridge, you can download your data into another Saturn machine (handy if you need to head to your friend's house because someone is hogging your Saturn machine).

Remember to insert and remove the Sega Saturn Backup from your Saturn when the power is OFF. Should you insert the cartridge when the power is ON, you could damage the cartridge.

Refer to the cartridge instruction manual for more info on the proper use of the cartridge.

AFTER INSERTING THE GAME CD...

Once the game has been loaded and the power to the Saturn is ON, the Sega™ and Sega Sports™ logos appear. An intro for Worldwide Soccer 98 begins after the logos. Watch some really good players show their stuff (or press START to forward to the Title screen, but you'll miss out on the action if you do!). The Title screen appears after the intro.

From the Title screen press START. Select the language you wish to use for the game. English, French and Spanish are all available. For an extra challenge to the game, select a language you don't know. Then you get to play and learn a language at the same time (who said the game industry is just entertainment?). Press the D-Pad LEFT or RIGHT to highlight, and Button A or C to select. If needed, press Button B to deselect. Press START to confirm your selection.

Select the mode you wish to access from the Mode Select screen. Press the D-Pad to highlight, and START or Button A or C to select. Refer to the following pages for descriptions of the game modes.

The symbol next to the player's name indicates his overall condition. Use the guide below to help you when deciding who's playing the match, and who might need to take a day off from the office (eh, field).

Red Arrow

The best you could hope for. This player is in peak condition.

Orange Arrow

Nothing wrong here! This player is ready to go.

Yellow Arrow

Fair condition. It's best to keep this player in the lineup.

Green Arrow

Below the level. Playable, but if there is a player in better condition, substitute.

Blue Arrow

Poor condition. This player needs a rest!

The pentagon at the top of the screen displays the skill levels of the players. The more area in the pentagon filled, the better the player.

WHEN THE WHISTLE BLOWS

The Pitch

A Little Intro to Football

(or soccer, as it is called in some parts of the world)

Football is divided into two halves. Your goal is simple (no pun intended): kick, head or get the ball into the other team's goal any legal way you can as many times as you can. The winner is the team that has scored more goals than the other at the end of two halves. Just how many minutes a half lasts in Worldwide Soccer 98 is for you to decide before the match (Time option, page 10).

The team who kicks off first gets the match started by pressing Button B.

The Player Marker

The player you are currently controlling is highlighted by the Player Marker. Other players on your team move automatically while you control the highlighted player.

There are two settings, AUTO and MANUAL, in the Options screen Marker option (see page 10). Before the match, when AUTO is selected, the Player Marker moves automatically to your player nearest the ball. When MANUAL is selected, press Button R during the match to change the Player Marker to another player.

Note: You can manually change the Player Marker even if you select AUTO for the setting.

Professional Fouls

Should you make your player do something dastardly during the match (you'll know when you perform an illegal move), you risk incurring the wrath of the referee. Judgement comes in three forms.

Free Kick

The opposing team is awarded a Free Kick. This is for lesser offenses such as heavily bumping an opposing player.

Yellow Card

The more dangerous the play, the more severe the penalty. If the referee penalizes one of your players with the Yellow Card, this is his way of warning you that another such dangerous play performed by that player will not be tolerated. In other words, one more Yellow Card or a Red Card and that player is sent off the pitch. The player cannot be replaced. To top things off, the opposing team gets a Free Kick.

Red Card

The most dangerous kinds of play (such as slide tackling from behind) run you the risk of earning the infamous Red Card. Your player is sent packing, and the other team is awarded a Free Kick.

For more on cards and fouls, see the Options screen (page 11).

Extra Time or Shootout?

What happens at the end of regulation time if the score is tied depends on your Options screen Extra Time and Shoot Out settings. Refer to the chart below to see the course your match takes.

If...

Then...

Extra Time is set to OFF and Shoot Out is set to OFF.

The game ends in a draw.

Extra Time is set to OFF and Shoot Out is set to ON.

A Penalty Shoot Out ensues.

Extra Time is set to ON and Shoot Out is set to ON.

A period of overtime is played. If the score is still tied then another period is played. In the event the score is still tied a Penalty Shoot Out ensues.

Extra Time is set to ON and Shoot Out is set to OFF.

A period of overtime is played. If the score is still tied then another period is played. In the event the score is still tied the game ends in a draw.

Making a Move

A diagram of the major moves for your game controller is available if you access the Options screen Pad Control option (page 12). So what are you waiting for? Get moving and master the fundamentals. Once you get them down you'll be hard to beat! Remember, there are more moves you can perform than the ones listed. Experiment to find them!

For many of the moves, you can set the direction where you want the ball to go by first pressing the D-Pad, then performing the move.
